The Gemini pendant is inspired by a fixture rescued from a 1920s theater in Illinois before its demolition.

- The bottom of the fixture features a colored glass jewel that emits a gentle glow.
- Light spills between each of the stacked trim rings.
- Spun from solid, 0.064" thick aluminum.
- OCL metal finishes are applied by hand and receive a protective clear coat lacquer.

- 21 standard powder coat paints offered, however all RAL colors available.
- Fixture offered with a variety of compact fluorescent, metal halide and incandescent optic packages.
- Contact factory for additional modifications or options.
