

# KWYET

ELEVATING EXPERIENCES.

## SOUNDS ABOUT RIGHT

**Kwyet is a visual masterstroke.** Its subtle omni-directional illumination fully lights the fixture's acoustic fins. Powered by our revamped Tubie 3 cylinder as the light engine, this volumetric light distribution delivers soft, general illumination at up to 117 lumens per watt.

The optional dual-circuited performance downlight provides another tool for layering of light and focused task illumination with 1525 lumens at 25 degree Narrow Flood and 1496 lumens at 60 degree Wide Flood.

A palette of **24 acoustic colors** lets the imagination play with a designer's eye toward acoustic lighting solutions. Utilize bold colors to evoke sunshine, new spring grass, blooming flowers, or open blue sky as a decorative statement. Or choose a more neutral pallet, creating the effect of fluffy clouds, sand, stone, or wood tones that effortlessly blend into the space.

OCL's 9mm acoustic fins are comprised of up to 50% post-consumer recycled PET and are fully recyclable. New or replacement fins [shapes or colors] can be easily swapped into installed fixtures at any time.

Kwyet is exceptionally durable and maintainable. Field replaceable components are easy to access and straightforward to service. The fins are flat packed to minimize packaging and shipping. Yet, the fins are quickly and easily field installed.

## FIND YOUR KWYET SPACE

### FEATURES

- 36" diameter angle, cone and ellipse shapes
- 21" or 33" diameter sphere shape
- Combination of our Tubie 3 luminaire and 9mm acoustic fins for sound mitigation
- 24 standard acoustic colors
- Choice of performance COB downlight with 1525 lumens at 25 degree Narrow Flood and 1496 lumens at 60 degree Wide Flood
- Available in standard white, BIOS, tunable white, and RGBW
- Offered with a wide range of CCTs: 2700K-3000K-3500K-4000K; 80+ CRI or 90+ CRI & R9 > 50
- **WELL BUILDING:** Contributes to WELL™ Features L03, L04, L07 & S04

### CONSTRUCTION

- 9mm acoustic fins made from minimum 50% recycled PET felt
- Evenly illuminated architectural cylinder with die cast aluminum end caps
- Extruded frosted white acrylic diffuser
- Acoustic fins are flat packed and easily field installed
- Meets ROHS v3

### COMMON MODIFICATIONS

Make a **major design statement** with custom sizes and shapes, or ambitious, sweeping clusters and displays.

**Kwyet's** lighting and acoustic color options create unlimited possibilities for uniquely spectacular lighting.
