Aro Cluster

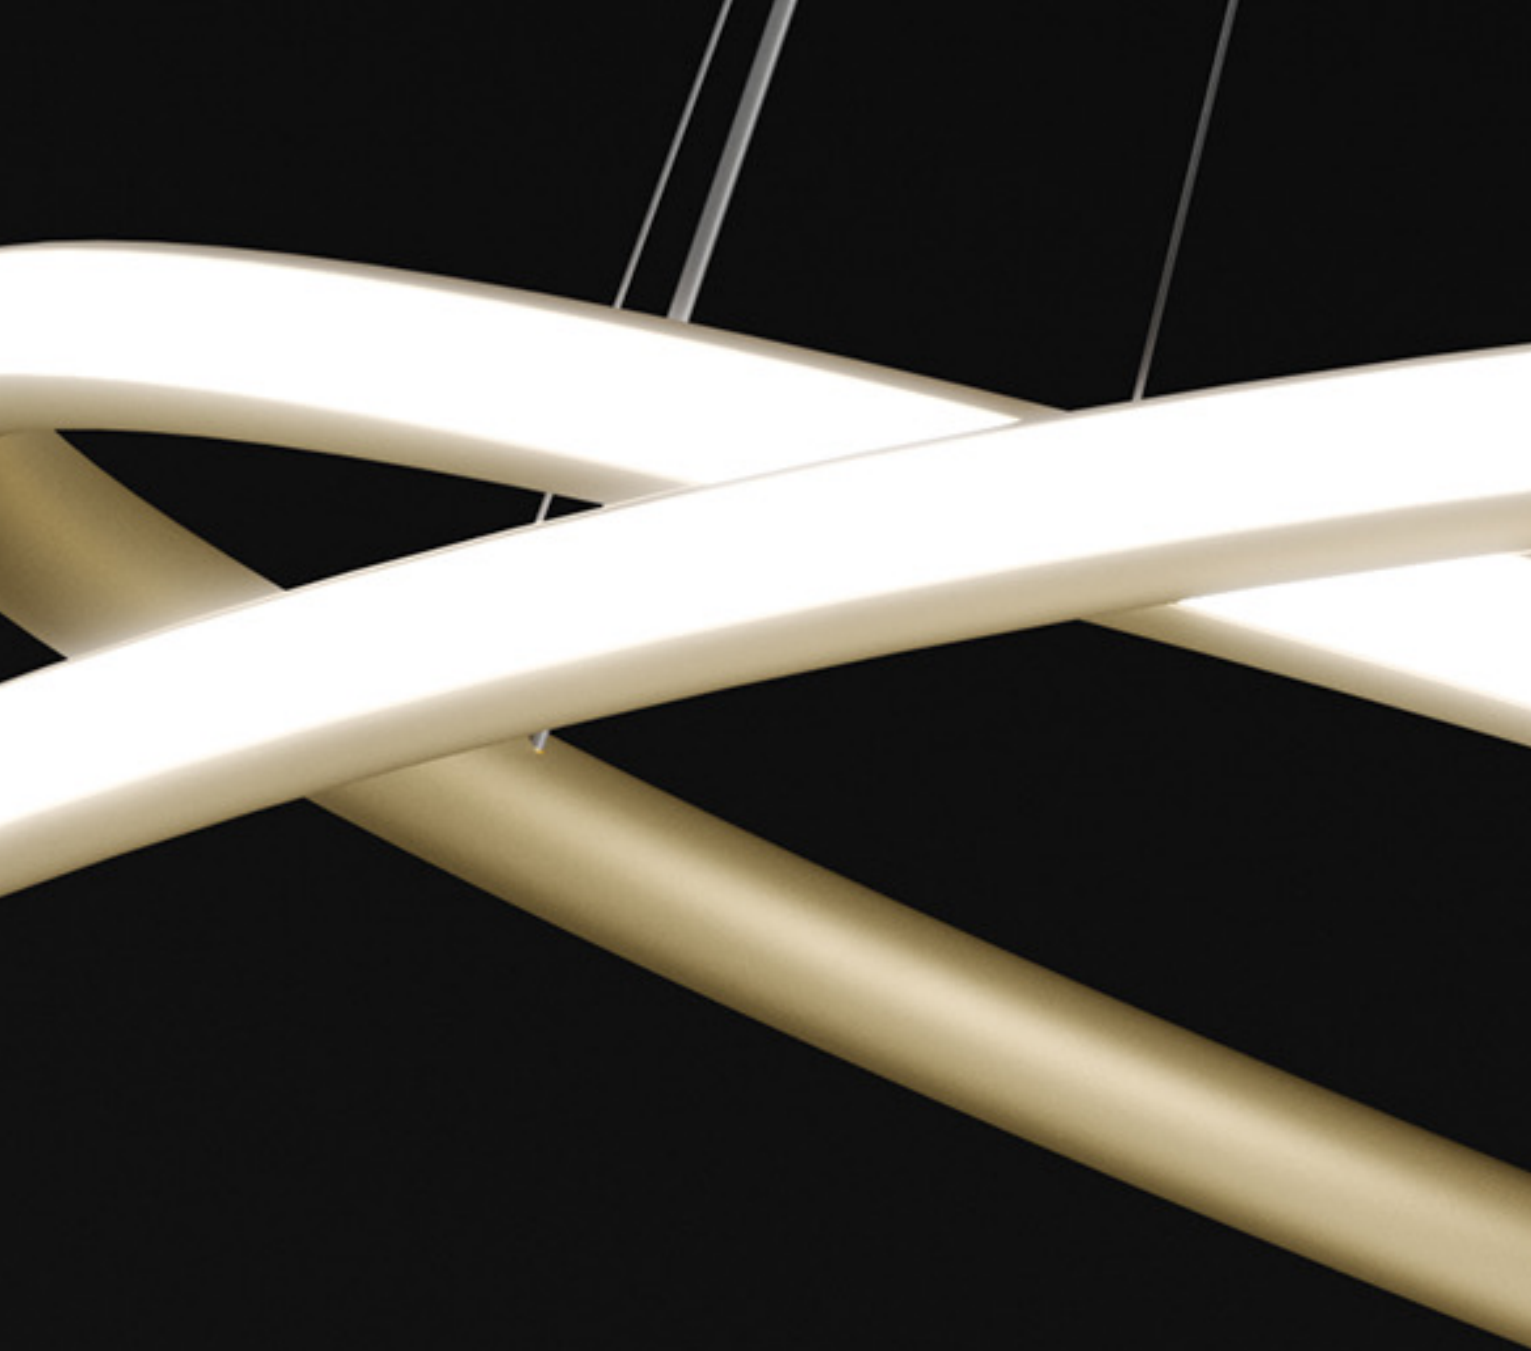

Aro Cluster

FEATURES

- Custom cluster design in five standard luminaire configurations
- Three 2-ring clusters (24"/36", 36"/48", & 48"/60")
- Two 3-ring clusters (24"/36"/48" & 36"/48"/60")
- Minimal 1.5" extruded aluminum profile size
- Extruded silicone lens creates a crisp & uniform appearance with no visible seam, no diode imaging or zero light leaks from expansion and contraction
- The central canopy has been redesigned from the ground up to offer functional versatility across all options and configurations.
- 3-step LED binning
- Inner Illumination, custom sizes, and various shapes are available as modifications

Aro Cluster's Silicone Lens

Aro Cluster utilizes a unique *extruded silicone lens*. This lens has a crisp, clean, and uniform appearance. The flexibility of the silicone allows the lens to slightly compress, creating invisible seams. Unlike traditional acrylic that can expand and contract, this silicone lens benefits from zero light leaks in any room conditions.
