

NeoTM Surface

NeoTM Surface

The Neo family expands - and this time it's bringing Wet Warm American Summer vibes with it.

OCL's Neo Surface provides a versatile and elegant lighting option that seamlessly integrates into any indoor, mid-door, or outdoor environment, providing exceptional illumination and enhancing the ambiance. Discover how this versatile fixture can transform your spaces with its remarkable capabilities.

Featuring a familiar, yet modern design, Neo Surface effortlessly complements various architectural styles, making it an ideal lighting option for a wide range of indoor, mid-door, and outdoor spaces. And Neo's introduction of **warm dim** and **RGBW** technology to the family, providing an additional layer of versatility to its indoor and outdoor lighting capabilities with the freedom to explore and tailor your lighting experience.

Neo's fully wet location version is ETL wet listed to UL1598, IP66-rated, and even IK10 impact rated. Neo checks so many boxes for both indoor and outdoor applications.

FEATURES

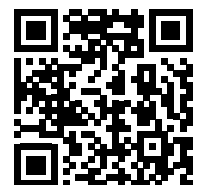

- Fully luminous shade provides visual presence with soft, uniform illumination, and optimal 60/40 distribution
- ETL listed for **wet location** to UL1598; IP66-rated
- Up to 111+ lumens per watt
- Two sizes - 18" and 24" - provide visual scale to fit numerous applications
- Offered with a wide range of **standard white** CCTs: 2700K-3000K-3500K-4000K; 80+ CRI or 90+ CRI & R9 > 50; **Warm Dim**, & **RGBW** light sources also available
- The surface luminance is maintained across the series for consistency in appearance in mixed use applications, but also is dramatically lower than **WELL** and **LEED** specifications at < 1600 cd/m²
- Minimal glare (see spec sheet for UGR details)
- Easily cleaned and wiped outer surface
- LED arrays and drivers are easily accessible and maintainable
- Shapes and sizes identical to OCL's popular **Nova** series, allowing seamless usage of both products in a single spaces
- Meets ROHS v3

CONSTRUCTION

- The shade is a fully enclosed, seamless, one-piece molded acrylic that is durable and designed to last for generations
- The fixture is fully sealed to eliminate dust and debris from getting inside
- **IK10 impact rated** - rugged and robust diffuser construction withstands bumps, hits, and strikes that traditional acrylic or glass may not
- The canopy is die-cast aluminum

CLEANING & CARE

- For general cleaning, use a soft microfiber cloth with mild glass or hard surface cleaner
- For heavier dirt or rough spots, a damp melamine foam sponge is recommended
- Avoid bleach or any other chlorine-based chemicals that may compromise the fixture.
