REV AUG2026

THE HOW TO: LET'S WALK THROUGH IT

How To Submit Your Rev Shapes Configuration

OPTION 1: START HERE

Choose your shape on the Preconfigured Submittal page and add your overall specs.

We'll do the heavy lifting and provide you with a drawing and/or quote for review and final approval.

OPTION 2: OR START HERE

Create your design on the Configuration Matrix on **Page 8**. Plug your spec - including your total linear inches - into the submittal worksheet, fire it off to OCL-Quotes@ocl.com, and **some bit of sorcery occurs**. Then we'll send a quote and drawing back to you to review.

OPTION 3: OR EVEN HERE

Head to our product page and use our downloadable STEP files to build your own custom fixture. Save the CAD assembly as a DXF or STEP (or another drawing style) file and **send it to OCL for review** at OCL-Quotes@ocl.com.

A QUICK NOTE: Our STEP files cover many, but not all possibilities for configuration. If you run into a challenge just reach out to us for help, or note it in your file.

Rev Shapes

Preconfigured or Custom Pendant/Ceiling/Surface

Shapeshifting architecture beyond the standard with preconfigured or custom user-configured luminaires using our popular and minimal Rev luminaire profile

BEFORE YOU START: HERE ARE A FEW THINGS TO KNOW

We Minimize Seams

Our team does its best to minimize or nearly eliminate seams, both in appearance and in number. Seam placement may vary depending on the shape and size of the fixture.

Standard or Custom Lumen & Wattage Output

We offer two standard lumen packages that match our Rev standard fixture. You can find the wattage and lumens delivered in the chart to the right. We can also deliver custom lumen packages. Reach out to us and we'll work with you.

Cables, Cords & Power

Linear lengths less than or equal to 36" will have 2 cable points (one at each seam or endpoint). Length greater than 36" will have 3 cable points (one at each seam and one in the middle of a seam). A power cord is placed approximately every 10'. Cord & cable placement may vary depending on the shape and size of the fixture. You'll get a chance to review these placements on your drawing.

Possibilities

This spec guide is just that... a guide. If you have an out-of-the-box idea that goes beyond what this guide can do, let's chat and see what we can make happen!

LUMENS & WATTAGE CHART		PER FOOT
LED1	LUMENS DELIVERED	185
	SYSTEM WATTAGE	4
LED2	LUMENS DELIVERED	300
	SYSTEM WATTAGE	6
CUSTOM LUMEN PACKAGES AVAILABLE		

PROFILE VIEW

STRAIGHTS & MITERED CORNERS

REM - RECTANGLE (MITERED)
TRM - EQUILATERAL TRIANGLE (MITERED)

PEM - PENTAGON (MITERED)
HEM - HEXAGON (MITERED)

OCM - OCTAGON (MITERED)
ANM - 90° ANGLE (MITERED)

A QUICK NOTE: For squares (mitered), refer to Stealth spec sheet. For linear straights, refer to Liner spec sheet

SOFT CORNERS

SQS - SQUARE (SOFT)
RES - RECTANGLE (SOFT)

TRS - EQUILATERAL TRIANGLE (SOFT)
PES - PENTAGON (SOFT)

HES - HEXAGON (SOFT)
OCS - OCTAGON (SOFT)

ANS - 90° ANGLE (SOFT)

A QUICK NOTE: all soft corner shapes will have a 12" outside radius unless specified.

CURVES, SQUIGGLES, & ELLIPSES*

1QA - 90° ARC (QUARTER CIRCLE)
2QR - 90° DOUBLE SQUIGGLE RIGHT (SHOWN)
2QL - 90° DOUBLE SQUIGGLE LEFT

3QA - 90° TRIPLE SQUIGGLE
1HA - 180° ARC (HALF CIRCLE)

2HR - 180° DOUBLE ARC RIGHT (SHOWN)
2HL - 180° DOUBLE ARC LEFT
3HA - 180° TRIPLE ARC

ELP - ELLIPSE
RCT - RACETRACK

* RV1 & RV2 only. For RV3 or RV4, contact factory.

THE HOW TO: CALCULATING THE SIZE OF YOUR FIXTURE

Here are Some Guidelines. You can put away the tape measure. Here's a little visual guide to help you calculate and spec the size of your fixture in the Preconfigured Submittal Worksheet. Rectangles, angles, racetracks and ellipses will require two dimensions (**SIZE 1** & **SIZE 2**). Straights, angles, squiggles & arcs, and polygons will only require one dimension (**SIZE 1**). **NOTE:** diagrams are shown in a top-down plan view.

SQUARES, RECTANGLES, ANGLES & RACETRACK

List your length (**SIZE 1**) and width (**SIZE 2**)

LENGTH (**SIZE 1**)

WIDTH (**SIZE 2**)

ELLIPSES

An ellipse is a bit trickier when it comes to dimensions. If the short side is too short, the extrusion can't be rolled to accommodate the radius.

See chart to the right for guidelines on sizing.

LENGTH (**SIZE 1**)

WIDTH (**SIZE 2**)

NOTE: Ellipses with tight turns on the short side like this example above are not possible. If you have questions about your dimensions, reach out to us.

ELLIPSE SIZE GUIDELINES	
LENGTH IN INCHES (SIZE 1)	MINIMUM WIDTH IN INCHES (SIZE 2)
60	41
72	45
84	48
96	52
108	55
120	58
132	61
144	63
156	66
168	68
180	71
192	73
204	75
216	78
228	80
240	82

STRAIGHTS, ARCS, & SQUIGGLES

List your overall length (**SIZE 1**). For arcs and squiggles, width will be determined by your length and shown in your approval drawing.

TRIANGLES, PENTAGONS, HEXAGONS & OCTAGONS

List your length or diameter in (**SIZE 1**) as shown below See the dotted bounding box for visual reference of your desired footprint.

MODS, NOTES, & COMMENTS

PROFILE VIEW

About our Rev Profile

Our Rev profile features offers a minimal cross section size (1.75" square) with in, out, down, or up/down illumination. It utilizes LEDs and reflectors that are easily field-replaceable. Our silicone diffuser eliminates light leaks and visible seams that can occur with thermal changes in a space.

CUSTOM REV SHAPES ALL THE PARTS & PIECES (FOR OPTIONS 2 & 3)

STRAIGHT LENGTHS

	
6" STRAIGHT	54" STRAIGHT
	
12" STRAIGHT	60" STRAIGHT
	
18" STRAIGHT	66" STRAIGHT
	
24" STRAIGHT	72" STRAIGHT
	
30" STRAIGHT	78" STRAIGHT
	
36" STRAIGHT	84" STRAIGHT
	
42" STRAIGHT	90" STRAIGHT
	
48" STRAIGHT	96" STRAIGHT

NOTE: For linear lengths greater than 36in, 3 cable points (one at each seam and one in the middle of a seam); For linear lengths Less than or equal to 36in, 2 cable points (one at each seam). Cord & cable placement may vary depending on the shape and size of the fixture. You'll get a chance to review these placements on your drawing.

SQUARES & RECTANGLES

SOFT SQUARES & RECTANGLES

A QUICK NOTE:
Our corners are fully welded with no visible seams.

CURVES & ELLIPSES

CUSTOM REV SHAPES CONFIGURATION MATRIX

Let's see if we can make this easy.

Grab a pencil (or a pen if you're feeling confident). Use the dot grid below to sketch your configuration using the parts from the previous pages. Label your parts and lengths. We'll take your sketch and create a drawing for your review.

[illegible]

A REMINDER ON THE GUIDELINES (...because the engineers asked us to): Linear lengths less than or equal to 36" will have 2 cable points (one at each seam or endpoint). Lengths greater than 36" will have 3 cable points (one at each seam and one in the middle of a seam) A power cord is placed approximately every 10'. All soft corner shapes will have a 12" radius unless specified. You'll get a chance to review everything on the drawing we send back..

YOU'VE MADE IT THIS FAR... NOW WHAT?

You did the thing! Send it to [OCL-Quotes@oclc.com](mailto:OCL-Quotes@oclc.org).

Here's what happens next...

- 1) We send you an email back acknowledging your outstanding custom design prowess. And maybe a question or two.
- 2) We wave our wand and a quote and approval drawing appear. Magic!
- 3) Then we'll send you both to review and approve.
- 4) You approve it! Success!**
- 5) Then our talented team makes it happen. And we gather around and Ooooo and Ahhhh at it when it's complete.
