

# Care Instructions for Printz 3D Printed Shades

## General Care:

Indoor use only unless specifically treated or designed for outdoor environments.

## Cleaning:

Dust regularly using a soft air duster, microfiber cloth or feather duster to prevent buildup.

For deeper cleaning, wipe gently with a damp cloth or use a soft sponge using lukewarm water and a mild soap solution.

Spot cleaning: For stubborn stains, use a lukewarm water and mild detergent solution, applied with a light-colored cloth. Dab at the stain gently without scrubbing.

Avoid solvents or alcohol-based cleaners, as these may cause surface hazing or weaken the part over time. Do not use abrasive or highly alkaline cleaners, acetone, benzene, leaded gasoline, or carbon tetrachloride.

## Disinfection:

If disinfection is needed, use a compatible disinfectant like a diluted bleach solution or 70% isopropyl alcohol.

Do not submerge in water or use high-pressure sprays.

## Handling:

Handle with care to prevent chipping or cracking, especially at thinner or detailed edges.

Do not twist or bend the shade during installation or removal.

Avoid abrasive scrubbing which can catch on the texture and cause delamination. A light polish with plastic-safe polish may restore some clarity or sheen.
