

MOBI, IN MOTION

A brand of  legrand

FORM IN MOTION, COMFORT IN EVERY LAYER

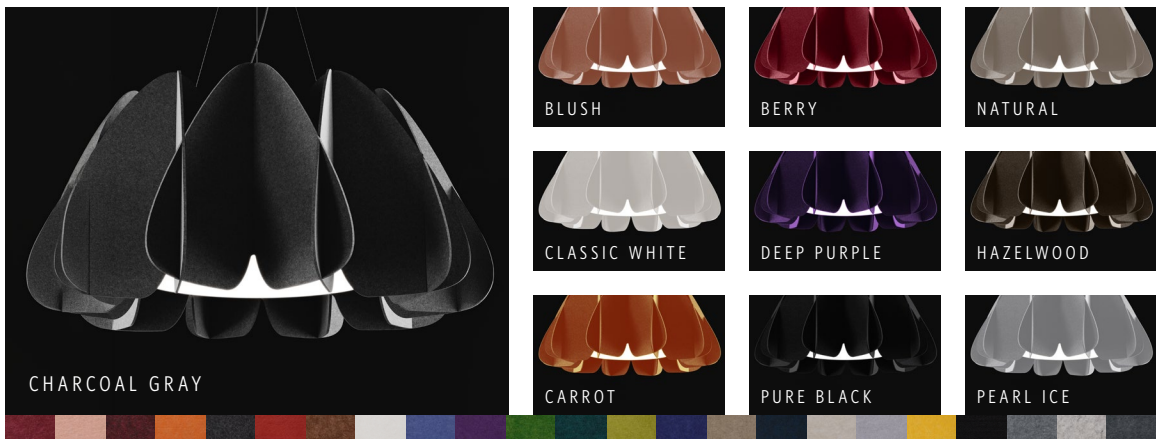

Mobi brings sculptural movement to architectural lighting with a radial composition of repeating acoustic fins surrounding a luminous drum. The layered geometry creates a sense of motion from every angle while helping soften sound within open and shared environments.

Technical Highlights

- 31", 46", and 63" diameters
- Direct or direct/indirect illumination
- Up to 16,705 delivered lumens
- Efficacy up to 113 lm/W
- 90+ CRI LED
- 2700K, 3000K, 3500K, or 4000K CCT
- More than 20 acoustic color options
- 9mm sound-absorbing acoustic fins
- Standard 0-10V dimming to 1%
- Optional dual circuiting

COLOR, COMFORT, AND QUIETER SPACES

Mobi's 9mm acoustic fins help reduce sound reflections, reverberation, and echo while adding depth, texture, and visual movement to the fixture. Made from 100% polyester fiber with a minimum of 50% post-consumer recycled material, the fins are available in **more than 20 colors** to complement the interior or create a bold focal point.
